ATTENTION! It is necessary to reach the Cave Ticket Office 40 minutes before the visit starts, at the square in front of the overland entrance of Capo Caccia, in order to observe the check-in and travel time of the staircase. If you do not show up at the preset time you will lose your reservation.

- **BY SEA**

The service is ran by two private companies regularly allowed to dock in Capo Caccia and it is operating from april to november during specific time slots. It is not allowed to reach the entrance of the Cave with private boats.

If you wish to visit the cave by sea, we inform you that the reservation is not necessary. Passengers travelling with scheduled boats automatically have a reservation to visit the Cave.

VISIT RECOMMENDATION

ESCALA DEL CABIROL

Once you arrive in Capo Caccia, to access the Neptune's Cave you have to walk the *Escala del Cabirol*, a 400 metres long staircase with 654 steps excavated into the cliff overlooking the sea, at a 119 metres in height.

The entrance through the *Escala del Cabirol* is easily accessible to people in good health, but it is advised against people with specific cardiac and respiratory diseases. The duration of the route along the staircase varies from person to person, since it depends on the age and personal physical conditions. On average,

you can consider **15-20 minutes** to go down and at least as many to go back up. It is recommended to wear comfortable shoes and to pay attention along the way.

In order to manage safely the descend and ascend times, it is necessary to wait for our operators instructions before taking the route through the staircase.

INSIDE THE CAVE

Visits are always guided both in Italian and in English. For organised groups and upon communication, there is the opportunity of a Spanish, French or German tour guide, depending on the visitors requirements.

Tours start every hour, last 30 minutes and depart from the Cave entrance, which is located at sea level.

Animals are allowed, as long as on a leash and with a muzzle at all times.

Check the Neptune's Cave [official website](#) for further information and to discover the history and curiosities of the underground world that stretches from the sea to the heart of Capo Caccia.
